All women, girls and people with a uterus have the right to decide freely whether and when they will have children. Related to this is the right to access to abortion provided with respect and dignity. No one may expose them to harmful actions or pressure them to change their decisions. Only they know best what to do and what their life circumstances are.

Safe abortion services must be provided in a way that respects the dignity of pregnant people, guarantees their right to privacy and is sensitive to their needs.

FREEDOM OF CHOICE

Leták bol vytvorený v rámci projektu 'Nebudte ticho s nami!'. Projekt je podporený z programu ACF - Slovakia, ktorý je financovaný z Finančného mechanizmu EHP 2014-2021. Správcou programu je Nadácia Ekopolis v partnerstve s Nadáciou otvorenej spoločnosti Bratislava a Karpatskou nadáciou.

# FACTS ABOUT ABORTION

These facts are based on the findings and claims of authorities such as the World Health Organization (WHO) and the International Federation of Gynecology and Obstetrics (FIGO) and the Royal College of Obstetricians and Gynecologists of the United Kingdom of Great Britain and Northern Ireland.

## Security

Abortion is one of the safest medical procedures, if performed correctly by a trained staff, using the right medical practices and medications and in hygienic conditions. Abortions without health reasons, performed properly and during the first trimester, are in fact safer than childbirth. Most women, and other people who undergo a properly performed abortion will not suffer any long-term consequences for their health and reproductive health.

## Abortion does not increase the risk of breast cancer

The WHO emphasizes that validated data does not indicate an increased risk of breast cancer after miscarriage or abortion.

## An abortion that was carried out without complications does not reduce your chances of getting pregnant in the future.

There is no proven link between abortion and subsequent infertility. Research shows that a properly performed abortion without complications does not lead to infertility.

Svetová zdravotnícka organizácia (WHO, 2012), *Safe Abortion: Technical and Policy Guidance for Health Systems /Bezpečné interrupcie: Technické a politické usmernenie pre systémy zdravotnej starostlivosti*; FIGO (2015) *Committee for the Study of Ethical Aspects of Human Reproduction and Women's Health, Ethical Issues in Obstetrics and Gynecology*; Kráľovská akadémia pôrodníkov a gynekológov Spojeného kráľovstva Veľkej Británie a Severného Írska *The Care of Women Requesting Induced Abortion: Evidence-Based Clinical Guideline Number 7/Starostlivosť o ženy, ktoré žiadajú o umelé prerušenie tehotenstva: na dôkazoch založený klinický postup č. 7* (2011).

## MENTAL HEALTH

Abortions do not cause serious mental problems. Negative psychological consequences occur in only a very small number of people and are rather a continuation of pre-existing mental health problems. For most women, girls and other people, the decision to have an abortion is not easy. Your response will depend on your situation at the time of the abortion. You may feel relieved or sad. These emotions can alternate in different phases. However, most people do not have long-term emotional problems. People who have unintentionally become pregnant and had previously experienced mental health problems should know that these problems can persist regardless of whether they choose to abort or continue the pregnancy. In case of problems, seek medical help or contact one of the helplines.

In case you have experienced sexual violence, you can call crisis number 00421800 212 212

# PRACTICAL INFORMATION

## TIME IS AN IMPORTANT FACTOR

In Slovakia, you have the opportunity to undergo an abortion on request or for health reasons until the 12th week of pregnancy. In the later period (after the 12th week), the abortion is only possible if the woman's life is in danger, if the fetus is unable to live or is severely damaged. The beginning of pregnancy is counted from the first day of the last period. That means in reality you have less time than 12 weeks. Also expect to have to wait a 48-hour compulsory waiting period after being counselled by a doctor and before the abortion itself. This restriction can cause, that you will not manage to get an abortion on time, so take it into account in advance.

## GIRLS UNDER THE AGE OF 18

Girls under the age of 16 the consent of their parent or legal guardian. Parents of girls between the ages of 16 and 18 will be notified by the medical facility.

## THE PRICE

According to our research, the average price with additional fees is 414 euros (from 250 to 600e). The price can be increased for example by fees for health examinations or application fee. Therefore, please ask about the total costs in advance
